

Reflection

I chose two words and their are enforcer and swollen. When I saw 'enforcer' I thought a headsman. So I designed a fat enforcer who is a monster to echo these two wards. I'm online student so I have to use the iPad to finish this work, this is my first time to make traditional animation. In the past, I would like to use After Effect and Photo shop to make animation. Because I think After Effect is easier than traditional animation. There are many shortcut keys which can help me to solve the movement problem. In this rotation project, traditional animation is difficult for me, I'm not good at controlling the speed of movement. In addition, I'm not a patient person, I always want to finish this work quickly so that I drew some terrible paintings, I had to redraw them. In my mind, I always think I have a good drawing basic so it is a piece of cake for me to finish 2 second animation. But I found it's not as simple as I think. Anyway, this is a special experience. In this class, I know what is traditional animation and learn some basic animation method. I have to say traditional animation has its own charm. But now I cannot control this art form and I need to practice it.
